LIQUIDITY

As at June 30, 2022 the Company had net working capital of approximately \$270,080, comprising \$4,895 cash; \$1,618 accounts receivable; \$234,625 barter receivables and \$58,070 in inventories against accounts payable and accrued liabilities of \$29,127. This is compared to as at June 30, 2021 the Company had net working capital of approximately \$215,146, comprising \$39,363 cash; -\$1,404 accounts receivable; \$150,273 barter receivables and \$48,785 in inventories against accounts payable and accrued liabilities of \$21,871.

The Company had barter credits with a total recoverable value of \$346991 (March 31, 2022 \$285,647). These amounts can only be realized through the purchase of goods and services through these barter exchanges. Management is satisfied that a sufficient value of transactions will be completed through these barter exchanges to realize a large portion of the value of this balance in the future.

Cash flows derived from operating activities for this period were negative \$ compared to negative \$9453 in Q1F22.

FTI Foodtech International Inc. June 30, 2022 MD&A

The Company owes \$255,181 in long term debt to a related party. See below under “**TRANSACTIONS WITH RELATED PARTIES**”. The Company has no financial commitments.

CONTRACTUAL OBLIGATIONS

The Company has no material contractual obligation, leases or commitments as of June 30, 2021.

TRANSACTIONS WITH RELATED PARTIES

At June 30, 2021, the Company owed a related company \$228,178 (Q1F22 - \$255,181), which is unsecured, non-interest bearing and due on demand and has been included in advance from related party. The above transactions were in the normal course of operations and are measured at the exchange amount, which is the amount of consideration established and agreed to by the related parties.

CRITICAL ACCOUNTING POLICIES AND ESTIMATES

The preparation of these financial statements requires management to make estimates and judgments and form assumptions that affect the reported amounts and other disclosures in these financial statements. The estimates and associated assumptions are based on historical experience and various other factors that are believed to be reasonable under the circumstances, the results of which form the basis of making the judgments about carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates under different assumptions and conditions.

Revenue recognition

Revenue from the resale of liquidation merchandise is recognized at the time of shipment and transfer of title to the customer has occurred (primarily to wholesalers and retailers) and collectability is reasonably assured. Sale of liquidation merchandise through the Barter Exchanges results in the earning of barter credits which are measured at the fair value of the barter credits received or receivable. In the case of returns, the Company’s policy is to offer exchanges of merchandise of similar value for goods returned in a timely manner by the customers.

Inventories

Inventories are valued at the lower of cost and net realizable value. Cost is determined principally on a first-in, first-out basis. The nature of the Company’s business can result in significant quantities of goods being purchased for sale over a number of years. These goods are reflected at cost until management determines that a write down to net realizable value is required.

New accounting pronouncements

Please refer to the notes of the financial statements of the Company dated March 31, 2022 for further information on the Company’s accounting policies and estimates.

FINANCIAL INSTRUMENTS

Under IFRS, all financial instruments must be classified into a defined category, namely, held-to-maturity, available for sale, loans and receivables, held-for-trading financial assets or financial liabilities and other financial liabilities.

The carrying values of the Company’s financial instruments are classified into the following categories:

	June 30, 2022	March 31, 2022
Held for trading assets (a)	4,895	24,575
Loans and receivables (b)	348,609	287,256
Other financial liabilities (c)	29,127	35,782

(a) Cash measured at fair value.

(b) Accounts receivable and advances to related party measured at amortized cost using the effective interest rate method.

(c) Accounts payable and accrued liabilities and due to related company measured at amortized cost.

Fair value

Fair value estimates of financial instruments are made at a specific point in time, based on relevant information about financial markets and specific financial instruments. As these estimates are subjective in nature, involving uncertainties and matters of significant judgement, they cannot be determined with precision. Changes in assumptions can significantly affect estimated fair values. The fair values of cash, accounts receivable, accounts payable and accrued liabilities approximate their carrying values due to the short-term maturity of these instruments. The fair value of the amount due to related party is not determinable as there is no comparable market data.

Currency risk

The Company’s functional currency is the Canadian dollar. All of the company’s cash is denominated in Canadian dollars. All of the Company’s purchases are transacted in Canadian dollars. There were no trade accounts receivable or accounts payable denominated in a foreign currency at period end. The Company is therefore not subject to any significant currency risks from operations.

Credit Risk

Credit risk is the risk of financial loss to the Company if a partner or counterparty to a financial instrument fails to meet its contractual obligations. Financial instruments which potentially subject the Company to concentrations of credit risk consist of cash and accounts receivable (other than Barter Credits).

Liquidity Risk

Liquidity risk is the risk that the Company will not be able to meet its financial obligations as they become due. The Company actively manages its liquidity through cash and equity management strategies. Such strategies include continuously monitoring forecasted and actual cash flows from
